UK Spouse Visa Application update (December 2023)

New salary requirements **£38,700** (up 210% from **£18,600**) – UK spouse visa

The UK Home Secretary, Mr James Cleverly has announced his plan to slash UK migration levels and curb what he calls abuse of the immigration system, he wants to deliver the biggest ever reduction in net migration to the UK. He believes that his new package will mean about **300,000** partners and children will not be able to come to the UK compared to last year (9/2022 to 9/2023).

Home Secretary James Cleverly said:

It is clear that net migration remains far too high. By leaving the European Union we gained control over who can come to the UK, but far more must be done to bring those numbers down so British workers are not undercut and our public services put under less strain.

*My plan will deliver the biggest ever reduction in net migration and will mean around **300,000** people who came to the UK last year would not have been able to do so. I am taking decisive action to halt the drastic rise in our work visa routes and crack down on those who seek to take advantage of our hospitality.*

In addition to measures to reduce migration, the government is increasing the annual Immigration Health Surcharge from **£624 to £1,035** (up 66%) this of course will make it more costly and difficult for UK settled partner to bring his foreign partner and children to the UK. Thus for partner alone without children **£5,101** for initial spouse visa from abroad compared to current base cost of **£3,868**.

Avoid getting your family stuck abroad act now!
